

MOHAMMED MUNEEB UR RAHMAN

AI & DS Engineering @ MCET | AI Intern @ Alfido Tech
Web-Dev Technology Lead @ GDGC MCET
Student Project Associate – AI/ML & Data Analytics

Email: memuneebhere@gmail.com

Phone: [+91 90591 70823](tel:+919059170823)

PROFESSIONAL SUMMARY

Results-driven Computer Science student with expertise in Artificial Intelligence (AI), Machine Learning (ML), Deep Learning (DL), Reinforcement Learning (RL), Generative AI, Agentic AI Systems, and Large Language Models (LLMs). Proficient in Data Science, Data Analytics, Full-Stack Web Development, UI/UX Design, API Integration, Database Management, and Cloud Deployment. Experienced in developing scalable AI-powered and data-driven applications using modern frameworks, intelligent automation workflows, and user-centric system design. Demonstrated leadership and team management skills through collaborative project development, technical coordination, and problem-solving in fast-paced environments. Strong communication, adaptability, and analytical abilities with a passion for innovation, emerging technologies, and building impactful digital solutions.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Methodist College of Engineering and Technology
2022 – Present | CGPA: 7.5

Intermediate

MS Junior College
2020 – 2022 | Percentage: 80%

Class 10

Greenwich Academy, The School (CBSE)
2017 – 2020 | GPA: 8.0

PROJECTS

Shardeum AI Risk Manager (Web3 + AI)

Description: Explored integration of artificial intelligence with Web3 architectures to assess and manage network risks in blockchain ecosystems. Gained hands-on exposure to decentralized systems, AI-assisted risk modeling concepts, and open-source collaboration.

Technologies: Web3, Blockchain Fundamentals, AI Risk Analysis, Decentralized Systems

GreenMind AI

Description: Built an LLM optimizer that optimizes prompts to keep the full meaning intact while drastically reducing words and tokens. Developed a chatbot interface that intelligently routes a prompt to an LLM, SLM, or mid-sized model to produce efficient output while drastically reducing computational costs.

Technologies: XAI, Deep Learning, Neural Networks, Reinforcement Learning, Policy-Based Learning

CryptoVista – AI-Powered Crypto Analytics Platform

Description: Built a data science-driven crypto analytics platform that collects, processes, and visualizes real-time and historical cryptocurrency data while dynamically performing scheduled ML operations. Implemented predictive modeling, technical indicator analysis, and interactive dashboards to deliver actionable insights for traders and analysts. Focused on scalable data pipelines, optimized model performance, and clean separation between data processing, ML logic, and frontend visualization.

Technologies: Scikit-learn, TensorFlow/Keras, React + Vite, REST APIs, Crypto APIs (CoinDCX),

CredGenie AI – Autonomous Credit Intelligence Platform

Description: Developed an AI-powered credit decisioning platform that automates corporate loan evaluation using structured and unstructured financial data. Implemented document intelligence, ML-based credit scoring, early-risk detection, promoter network analysis, and LLM-generated Credit Appraisal Memos (CAMs) with explainable loan recommendations through scalable AI-driven pipelines and dashboards.

Technologies: OCR (Tesseract/PaddleOCR), LangChain, LLMs (OpenAI), REST APIs, Web Scraping, Chart.js

SKILLS

Artificial Intelligence & Generative AI: LLM application development, Gemini integration, RAG & Multi modal RAG systems, prompt engineering, LL fine-tuning/testing, LangChain, LangGraph, NLP, XAI, reinforcement learning, AI workflow orchestration, n8n automation, MCP protocols

Machine Learning & Deep Learning: Supervised/unsupervised learning, ML pipelines, feature engineering, predictive modeling, CNNs, RNNs, Transformers, Autoencoders, cGANs, neural network training and optimization

Data Science & Analytics: Data collection, preprocessing, EDA, statistical analysis, Pandas, NumPy, Matplotlib, Scikit-learn

Full-Stack Development & APIs: MERN Stack, React, Angular, Vite, FastAPI, REST APIs, Supabase, scalable frontend-backend integration

Web3 & Cloud: Blockchain fundamentals, oracle frameworks, AI-Web3 integration, Google Cloud Console

Programming & Tools: Python, JavaScript, Git, GitHub, Jupyter Notebook, REST APIs

Professional Skills: Technical leadership, teamwork, communication, analytical problem-solving, project coordination

EXPERIENCE

Web Development Lead

GDGC MCET (Google Developer Groups on Campus, MCET)

- Led the web development vertical, designing and maintaining platforms for technical events and community initiatives.
- Mentored developers and enforced modern web standards using **MERN** and full-stack frameworks.
- Collaborated across teams to deliver scalable, user-centric web solutions.
- Organized training workshops, sessions, events, and hackathons.

Part-Time Developer

Dare2Dream Club – PM International

- Developed and maintained websites and online platforms for events, workshops, and digital products
- Managed deployments, platform operations, and technical infrastructure
- Provided technical support for online and offline events

HACKATHON EXPERIENCE

IIT Roorkee E-Cell – E-Summit Hackathon (“Mind the Product”)

Status: 4th (**National Level**).

- Designed an IoT-integrated AI system for managing 1M+ railway assets
- **Architected scalable data pipelines for real-time analytics.**
- Focused on predictive monitoring, anomaly detection, and lifecycle management

AI Intern

Alfido Tech | 4 Months

- Worked on applied AI and ML solutions
- Developed and evaluated ML/DL models
- Integrated Python-based AI workflows into applications

Student Project Associate – AI/ML & Data Analytics (L&T Metro Rail Hyderabad)

- AI/ML-driven student ridership survey, analysis, and prediction for red line metro corridors across Hyderabad
- Built a real-time project sanctioned by L&T
- Data collected through direct interaction with customers
- Project developed over a period of 5 months

Hack’Forge – ISL College of Engineering & Technology

Position: **2nd Place**

- Built an LLM optimizer to reduce token consumption and computational cost
- Designed a chatbot that routes prompts to the most suitable LLM/SLM

CERTIFICATIONS & AWARDS

- **Develop AI-Powered Prototypes in Google AI Studio – Google Cloud Skills Boost (Jan 2025)**
- **Train a Small Language Model – Google Cloud Skills Boost (Jan 2025)**
- **Inspect Rich Documents with Gemini Multimodality and Multimodal RAG – Google (Dec 2025)**
- **Prompt Design in Vertex AI – Google Skill Badge (Dec 2025)**
- **Introduction to Cybersecurity – Cisco Networking Academy (Nov 2025)**
- **Data Visualization and Business Intelligence using Power BI – Microsoft (Aug 2025)**
- **Completion of Student Associate tenure (Dec 2025-April 2026)**
- **Student of the year award (2019-2020)**

PROFILE

- Ability to face any kind of challenges, high energy person with positive attitude, strong sense of responsibility with lots of patience, self motivation

ABOUT ME

- **Nationality:** Indian • **Status:** Unmarried • **Date of Birth:** 16th April 2003
- **Linguistic:** English (professional), Hindi fluent in speaking and writing, Telugu and Urdu (Elementary level)

INTERESTS

- Science and technology • Event and Workshop Organizing

EXTRACURRICULAR ACTIVITIES

- **Model United Nations (MUN) Delegate** • **Active Member, National Service Scheme (NSS), MCET**

HOBBIES

- Poetry and Literature • Football, Gym and Fitness
